

Dog Waste bin Contracts

01628 337 337

bookings@cookhamwaste.co.uk

Dog Waste is something that affects many people as it's extremely toxic, containing E.Coli, salmonella and other infections that may also cause blindness.

Children can get seriously ill from general play, as balls and toys that come into contact with faeces transfer and onto hands and faces. Even other dogs can get ill from each others faeces that might be laden with parasites or disease, and every day people can end up with it on shoes and bicycle tyres, and responsible dog owners that pick it up, need somewhere to put it !

For businesses and Parish Councils that have their own waste bins that require emptying, Cookham Waste provide a service that appears to be second to none in our area of operation.

The frequency of collection and cleaning schedule varies from site to site. Some we service weekly, and others twice a week with ad hoc collections available at peak demand.

Cookham Waste can provide bins to you on a rental basis, with full maintenance in the event that they are damaged or vandalised, or can simply service your own bins provided they are of a serviceable nature, and are a suitable size. The reason we have to limit size is that a full bin is extremely heavy, and over that recommended by the HSE for lifting by one person.

We vary the times we clean them down, again depending on location. Amongst our Clients are the National Trust, we service several sites for them including Cliveden, and they are delighted with what we do.

If you would like a quote, either to service existing bins, provide new or additional, please get in contact. Your site may also benefit from high footfall and bins could be installed and serviced free of charge to your business. **CALL US FOR MORE INFORMATION** and arrange a free survey of the site.
